Children start to become aware of the world of careers as early as pre-school. Even through simple life experiences, they become aware of the nature of careers and they begin to form their own ideas about career roles.

The coloring pages and activities in this book are intended to be fun for children in the Pre-K to 3rd grade age groups. They have been designed around the 16 Career Clusters that were developed by the U.S. Department of Education. Some of the activities in this publication were adapted from "Career Peeks" by the Montana Department of Labor.

This is the second edition of the Careers Coloring & Activity Book. We encourage teachers to share with us any feedback you may have on the book or any unique teaching methods that we can share with your colleagues in the state.
