Please read the following. Contact the Consultation Project Manager if you have any questions.

1. The consultation service is provided at no cost to employers through federal and state funds. Priority in scheduling is given to requests received from small businesses that are in high-hazard industries or have the most hazardous conditions at issue in the request.
2. The Consultation Program is dedicated to assisting small, high-hazard employers reduce occupational injuries and illnesses through the identification and correction of hazards. While the identification of hazards by a consultant will not mandate the issuance of citations or penalties, the employer is required to take necessary action to eliminate employee exposure to a hazard, which in the judgment of the consultant, represents an imminent danger to employees; and to take action to correct within a reasonable allotted time, any serious hazards that are identified. The discovery of such a hazard will not initiate any enforcement activity unless the employer fails to eliminate the identified hazard within the established time frame or extension period.
3. While utilizing this service, employers remain under a statutory obligation to provide a safe and healthful worksite and working conditions for employees.
4. Employee involvement is an element of an effective safety and health program. The consultant will confer with a reasonable number of employees concerning matters of workplace safety and health.
5. The employer must agree to post a list of all serious hazards found by the consultant and the correction due dates, and to notify affected employees when hazards are corrected. OSHA Enforcement cannot schedule a compliance inspection in response to a complaint based upon a posted List of Hazards unless the employer fails to meet his obligations to correct hazards, or fails to provide interim protection for exposed employees.
6. The employer must agree to make information on the corrective actions proposed by the consultant, as well as other-than-serious hazards identified, available at the worksite for review by affected employees.

I acknowledge that I have the authority to make a request for consultation assistance on behalf of my employer. I also agree to provide the Consultation office with 3 years of Injury & Illness logs (OSHA 300 logs) or the most current year log if 3 years is not available, prior to the consultation visit, for review and analyses.
