

Safety and Health Achievement Recognition Program (SHARP)

The Safety & Health Achievement Recognition Program recognizes small business employers (<250 employees) who have used OSHA's On-site Consultation Program services and have established an exemplary injury and illness prevention program. Acceptance of your worksite into SHARP from OSHA is an achievement of status that singles your company out among your business peers as a model for worksite safety and health.

The Delaware Department of Labor administers OSHA's On-site Consultation Program, the agency's primary program for providing small business owners **FREE AND CONFIDENTIAL** safety and health consultation services. The services help businesses address hazards and improve workplace safety and health without fear of citations or monetary penalties. These programs are funded by OSHA and run by State grantees that are highly trained and knowledgeable about the needs of the small businesses we serve. State grantee for Delaware employers is the Delaware Department of Labor.

Worksites that achieve SHARP status are deferred from programmed OSHA Enforcement inspections while they are in the program.

Delaware's Safety and Health Consultants receive the same training as OSHA's Compliance Officers and know how to protect your workers. Take advantage of their expertise and request an on-site consultation visit today!

When you think about requesting a consultation visit, also think "SHARP"... and ask your consultant how you can work together to achieve SHARP recognition!
